

FADHEELUDDEEN K

AI / ML Engineer

AI Engineer • Machine Learning Engineer • Data Scientist • Generative AI / NLP Engineer
Chennai, Tamil Nadu | +91 86674 24522 | trichyfadheel@gmail.com | [Linkedin](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer Science graduate (B.E., 2026) targeting AI/ML engineering roles, with hands-on experience building AI-driven applications, computer-vision/OCR pipelines, and full-stack systems. Skilled in Python and machine learning with practical exposure to LLMs, generative AI, prompt engineering, and deep learning, backed by full-stack and automation experience across two internships. Focused on building reliable, end-to-end intelligent systems.

TECHNICAL SKILLS

Programming:	Python, SQL, JavaScript, C, C++
AI / ML:	Machine Learning, Deep Learning, Neural Networks, NLP, Computer Vision, Generative AI, LLMs, Prompt Engineering
ML Libraries & Tools:	PyTorch, TensorFlow, scikit-learn, NumPy, Pandas, Matplotlib, OpenCV, EasyOCR, Hugging Face
Data & Visualization:	Power BI, Excel, SQL, Data Analysis, Dashboards
Web & Backend:	React.js, Node.js, Express.js, REST APIs, HTML5, CSS3
Databases:	MySQL, PostgreSQL, MongoDB, Firebase
DevOps & Tools:	Git, GitHub, Docker, Linux, n8n, CI/CD, VS Code

EXPERIENCE

- Engineer Intern — Technavious, Chennai

May 2026 — Present

 - Developing an OCR / computer-vision pipeline for the SensorSync O&M platform — set up PyTorch with CUDA and evaluated OCR models (EasyOCR, Qwen2.5-VL) to automate reading extraction from instrument displays.
 - Administered the dcist-user-ui GitHub repository — configured a Git Flow branching model and managed contributor access.
 - Contributing to internal web-application development with React, TypeScript, and Firebase, including debugging, testing, and feature delivery alongside the team.
- Software & Automation Intern — SolidPro Engineering Support, Chennai

Sep 2025 — Nov 2025

 - Skill-oriented internship in the Digital Transformation department — built workflow automations using n8n, reducing manual operational tasks; developed a full-stack app with React and Node.js.
 - Used Python for scripting and backend logic; performed debugging, testing, and iterative improvement on real production workflows.
 - Completed with an overall intern evaluation score of 8/10, rated 'Superior' on learning appetite.

PROJECTS

- InstrumentSync — Field-Instrument Data Automation Platform

End-to-end system that captures readings from field test instruments for data-centre capacity assessments — pulls data electronically from memory-based instruments, reads display-only meters via GPU-accelerated OCR, and publishes to a live dashboard with Excel/Word report export for initiating maintenance.
- Personal Portfolio Website

Animated, CI/CD-deployed portfolio dashboard, with Excel/Word report export for initiating maintenance pipeline (GitHub Actions), with scroll-driven animations and interactive project showcases.
- AI-Driven Interactive Interview System

Resume-aware mock interviewer simulates interviews from uploaded resumes; generates technical questions and assesses answers with improvement-oriented feedback.
- Symptom-Based Medical Diagnosis Tool

Preliminary diagnosis assistant predicts possible conditions from user-reported symptoms using decision-tree and rule-based logic for quick preliminary analysis.

AI-Based UI Generator — Prompt-to-layout tool
Generates UI layouts from textual requirements, translating functional descriptions into React UI components to speed up frontend work.

SPENT Ticketing Portal — Enterprise IT ticketing system
Internal ticketing system with department configuration, role-based access, SLA management, and a Help Center module.

Claude Counter Desktop — Open-source Electron app
Electron desktop app, wrapping Claude AI with injected usage-counter scripts; resolved a Node v24 install issue and shipped a Windows installer on GitHub (MIT).

Microcontroller Display System — I2C embedded hardware
I2C-based hardware display assembly with embedded firmware, handled circuit assembly, soldering, and hardware/software debugging for reliable output.

CERTIFICATIONS & ACHIEVEMENTS

AI & ML Hackathon — 1st Place Winner · National Conference — Paper Presentation · Artificial Intelligence & Machine Learning Workshop · Artificial Intelligence Workshop · AI & ML Hackathon — Participant · Introduction to MongoDB · Mathematics for Machine Learning and Data Science · Supervised Machine Learning: Regression and Classification · Deep Learning & Neural Networks.

Currently pursuing: Claude AI (Anthropic) certification course · Microsoft Azure Cloud AI · Google Cloud.

Achievements: 1st Place — AI & ML Hackathon, Techgyan @ IIT Madras (Apr 2025). Presented the paper "Computer Vision-Based Intelligent Crowd Anomaly Detection System" at the 9th National-Level Conference on Modern Trends in Engineering & Technological Sciences, Nandha College of Technology (Mar 2026). Team Lead — National-Level Technical Symposium, led a 300+ participant event (speakers, logistics, coordination). Completed AI & ML workshops at IIT Madras (Techgyan, Apr 2025).

EDUCATION

K. Ramakrishnan College of Technology	B.E., Computer Science — 2026 · CGPA: 7.05 · Tiruchirappalli
Samadh Higher Secondary School	HSC (Mathematics & Science) · Trichy
